

Islington Left Unity

On the NHS

(this is instead of what we submitted to the founding conference)

Left Unity members and branches will work within broad based campaigns to defend the NHS whether these are local branches of groups like Keep our NHS public or specific local initiatives like the Defend the Whittington Coalition. We will produce and distribute our own material where appropriate, especially in situations where these campaigns do not have policy on questions we think are important and relevant. We will however not seek to set up our own campaigning organisations where there are already campaigns that we can work in; on the contrary we think that only through joint action with others will we win some battles against this government, and we don't want to build 'party fronts'.
