
Stop blackmailing Greece – Drop the debt now!

Greece is in the front line of the battle against austerity. The Syriza-led government and the Greek people are standing up to the bankers' and politicians' financial blackmail – they are an inspiration to us all.

Now in this crucial moment the key task for the anti-austerity movement in Britain and across the world is to stand with the people of Greece, delivering all the support and solidarity we possibly can.

A defeat for Greece would be a defeat for us all – but their victory can be our victory too.
